Key Benefits

- Pay for what is what is being utilized and no hidden costs
- Expertise professionals capable of working in multiple cloud products which includes IBM Cloud, Amazon, Azure, OpSource, UEC & more
- Decrease your TCO through reduced hardware purchases and energy bills
- Secured infrastructure which limits your risks for your placed sensitive data
- Scalable to demand
- Free Cloud readiness Assessment
- Proof of concepts and pilot implementations
- Technical & Pre-sales support
- Quick deployments and Faster Implementation
- Post Implementation support at much affordable cost
- Round the clock customer by a dedicated customer support team

ZSL follows a strategic Cloud Assessment methodology to help the enterprises adopt the cloud computing models that best suits their needs.

Cloud Assessment Methodology

- Develop deployment, Integration & migration plan
- Develop business case

5 Recommendations & Roadmap

- Evaluate Cloud provider options
- Evaluate potential technology & tools

4 Tools, Technology & Partner Evaluation

- Identify opportunity areas (SaaS, IaaS, PaaS)
- Assess gaps & readiness for the cloud

3 Cloud Readiness & Fit Analysis

Business Functiona Analysis

1
- Business goals
- Functional solution areas

Technology Analysis

2
- Current application landscape
- Technology Infrastructure
- Technical requirements

Some of ZSL's Cloud-based Solutions:

PowerCube DaaS (Desktop as a Service)

PowerCube DaaS
Empowers Desktop Virtualization

ZSL's PowerCube DaaS is an innovative virtual desktop collaboration solution on Ubuntu Linux or Windows Server available for deployment in private & public clouds. The solution supports variety of devices that includes PCs, laptops, net books or any thin clients and can run Windows Desktops and/or Linux Desktops.

The solution provides centralized desktop management capabilities and multiple desktop environments for end users minimizing the effort of IT administrators involved in desktop settings and application configurations. This Green & Eco-friendly solution provides an extended PC refreshing cycle time and reduces the cost incurred in hardware purchases and licensing.
